DETAILED ACTION

1. This office action is in response to the amendment filed 26 April 2010. Claims 1, 6, 9 and 10 have been amended. Claim 11 is added. Claims 1, 5, 6, 9-11 are currently pending.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Election/Restrictions

3. Newly submitted claim 11 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The previous claims were directed toward a compact substrate having hydrogen permeability while Claim 11 is directed to a substrate having oxygen permeability. The oxygen permeable compact layer is formed from silver or a lanthanum oxide compound (Page 17, lines 15-20). The hydrogen permeable compact layer is formed from Palladium or Palladium alloy (Page 5, lines 5-10).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 11 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it

pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1 and 6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims state "a porous layer having pores, wherein the porous layer is inorganic and comprises a thin film, multiple layered porous body" The porous layer is not disclosed in the specification as a thin film, multiple layered body. The porous layer is disclosed as a single layer this is supported by figure 2 and page 2 lines 9-11 of the specification.

It is noted that claim 11 (withdrawn claim) also includes this terminology.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

8. It is not clear to the Examiner whether there is an additional layer included in the multilayer electrolyte or if the Applicant is referring to the palladium as the compact substrate. From the specification, there appears to be support for the compact substrate to be palladium and

Art Unit: 1795

for the hydrogen permeable metal layer to be a triple layered film. However there does not seem to be support for a bi-layered hydrogen permeable layer (see figure below).

Claims 5, 9 and 10 are also rejected for depending from a rejected claim.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
